The Essential Guide to the Electric Universe (EG2EU)

Written by Bob Johnson

Edited by Jim Johnson

Contents

Contents

Essential Guide to the EU – Preface

Essential Guide to the EU – Introduction

Essential Guide to the EU – Chapter 1 Distances in Space

Essential Guide to the EU – Chapter 2 Magnetic and Electric Fields in Space

Essential Guide to the EU – Chapter 3 Plasma

Essential Guide to the EU – Chapter 4 Electromagnetism

Essential Guide to the EU – Chapter 5 Plasma Sheaths, Cells, and Current-Free Double Layers

Essential Guide to the EU – Chapter 6
Currents, Filaments and Pinches

Essential Guide to the EU – Chapter 7
Birkeland Currents, Magnetic Ropes and Current-Carrying Double Layers

Essential Guide to the EU – Chapter 8
Current Sheets, Perpendicular Currents and Electric Circuits

Essential Guide to the EU – Chapter 9
Plasma Circuit Instabilities

Essential Guide to the EU – Chapter 10
Rotational Effects

Essential Guide to the EU – Chapter 11
Radiation

Appendix I – Vector Algebra

Appendix II: The Electro-magnetic Field Equations
